## **METEC, June 28 – July 2, 2011 in Düsseldorf, Germany**

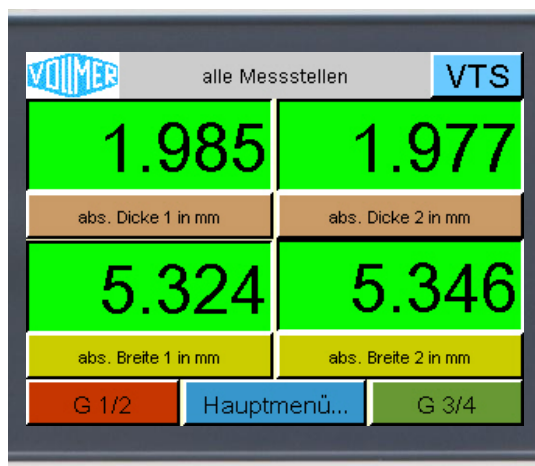

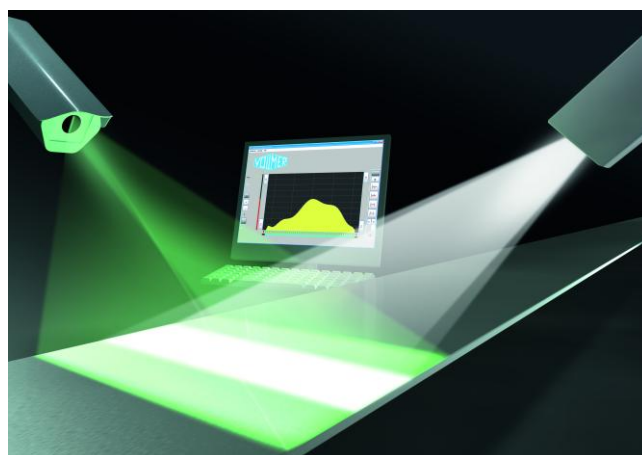

Dear Ladies and Gentlemen,

You are cordially invited to visit us at the METEC,

Hall 4, Booth D 16.

We will be pleased to show you our exhibits:

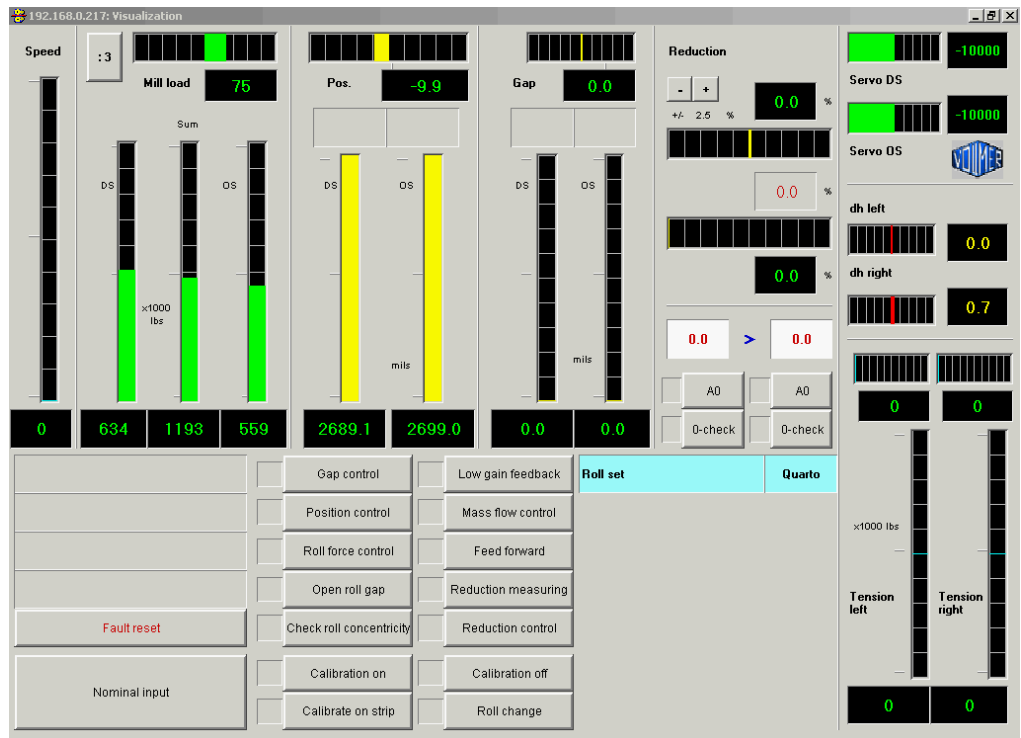

The new optical non-contact shapemeter system  
VIP08 may be of particular interest.

Or VTS, the uncomplicated, reasonably priced alternative to the conventional evaluation of contact gauges:

- 1 touch-screen-monitor in place of 4 amplifiers.
- Strip thicknesses up to 10 mm without motor or manual transducer adjustment.

Our strip thickness and shape control systems that will be exhibited at our booth will certainly also be the subject of many discussions.

Especially we are looking forward to meeting you in person again.

If you need more information or a free guest pass, please let us know.

Sincerely yours

Friedrich Vollmer

Feinmeßgerätebau GmbH

Elke Roller

Vollmer:

- Strip thickness measurement (contact, X-ray, isotope)
- Strip thickness control (AGC, mass flow for example)
- Strip shape measurement (BFI or non-contact)
- Strip shape control
- Hydraulic screwdown
- Statistical process evaluation
- FFT
- Off-line cross profile measurement
- Burr height measurement
- Curvature measurement
- ...
